

Bright ideas can start anywhere.

Adam Metal Products

Whether it's your idea for a new lighting product, a modification to one of our current products or for general metal forming, Adam Metal Products can help you engineer and manufacture it.

- Quality is our primary concern
- We offer far more than our standard product line
- In-house engineering and computer aided design to help develop your product
- Manufacturing of proprietary fixtures built to your specifications
- In-house tool and die making
- Fixtures designed in accordance with UL guidelines

Use our resources so you can use yours more efficiently!

Where bright ideas take *shape!*

Equipment and Capabilities

our **Staff** + our **Resources** = **Flexibility**

Tool and Die Department

Build new tools and dies and modify existing tools to customer requirements.

Power Presses (39)

5 to 150 tons using single stage blanking tools as well as progressive dies.

CNC Turret Punches (4)

Our extensive variety of tooling enables us to produce many fixtures to customer specifications without tooling costs. Custom perfling available.

Press Brakes, including CNC (8)

Longitudinal forming up to 10 feet.

Rollformers (14)

6 to 14 stands, longitudinal forming from 18" to 144" for high volume requirements.

Riveting, Welding and Studding

Produce sub-assemblies as well as assemble fixture bodies and ballast covers with studs for ground and ballast mounting.

Packaging

Extensive use of die-cut inserts and pads to protect our products during shipping. Special skids used for our linear indirect lighting and staggered strip products.
